

FORD PROVING GROUND SITE TOUR

Managing global operations and remote teams to meet increasingly complex global standards in vehicle development and testing.

Ford retains a significant operation in Geelong at the You Yangs world class vehicle testing facility. The 900 ha site has been in operation for over 50 years for the research, development and design of previously local, now global, vehicles in the Ford fleet.

It is one of the few fully-equipped Ford proving grounds in the world, and the local team is highly regarded for their expertise in vehicle development as the company continues to build its capability as an innovator and centre of excellence for the Asia Pacific region post-2016.

Join us for a tour of this recently upgraded facility.

- See how global operations are managed through local and remote teams, customers and suppliers.
- Hear how the Durability programs and Emissions testing align to global partners.
- Find out about the continuing role the You Yangs Proving Ground will play in both the Geelong community, but also Ford Australia going forward.

WHEN: Wednesday, November 30, 2016
